DETAILED ACTION

Election/Restrictions

The Examiner made a restriction requirement during a telephone call with Atty. Judith Byorick on March 31, 2005. Given the fact that claims 55-75 have been found allowable over the prior art of record (as set forth and explained below) and because independent claim 1 (and dependent claims 2-54) disclose the same allowable subject matter, the telephonic restriction requirement is withdrawn and claims 1-75 are passed to issue

Allowable Subject Matter

Claims 1-75 are allowed.

The following is an examiner's statement of reasons for allowance:

The references alone or in combination fail to teach the following:

1. a condensation reaction between a diacid, a monoacid, and a **diisocyanate** forming a tetra-amide, and
2. a condensation reaction between a diacid, a monoacid, and a **diisocyanate** forming a tetra-amide which is admixed with a colorant to form a phase change ink composition.

The closest reference of record is Frihart et al (US Patent 4,830,671), which teaches a tetra-amide, but does not teach the method of making the tetra-amide as set forth in Applicant claims 55 and 1.

Therefore the references are not seen to teach or fairly suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The remaining references listed on form 1449 have been reviewed by the Examiner and are considered to be cumulative to or less material than the prior art references relied upon in the above rejections. The cited reference has not been considered because no copy of Preparative Methods of Polymer Chemistry p. 102 is present in the application.
